Email Account Use Policy

1. In an effort to increase the efficient distribution of critical information to all faculties, staff and students, and the College administrators, it is recommended to utilize the College's e-mail services, for formal College communication and for academic & other official purposes. E-mail for formal communications will facilitate the delivery of messages and documents to campus and extended communities or to distinct user groups and individuals. Formal College communications are official notices from the College to faculty, staff and students. These communications may include administrative content, such as human resources information, policy messages, general JNTUA University messages, official announcements, etc.
2. To receive these notices, it is essential that the e-mail address be kept active by using it regularly. Staff and faculty may use the email facility by logging with their User ID and password. For obtaining the College's email account, user may contact System Admin for getting email account and default password.
3. Users may be aware that by using the email facility, the users are agreeing to abide by the following policies:
4. The facility should be used primarily for academic and official purposes and to a limited extent for personal purposes.
5. Using the facility for illegal/commercial purposes is a direct violation of the College's IT policy and may entail withdrawal of the facility. The illegal use includes, but is not limited to, the unlicensed and illegal copying or distribution of software, sending of unsolicited bulk email messages. And generation of threatening, harassing, abusive, obscene or fraudulent messages/images.
6. While sending large attachments to others, user should make sure that the recipient has email facility that allows him to receive such large attachments.
7. User should keep the mail box used space within about 80% usage threshold, as 'mail box full' or 'mailbox all most full' situation will result in bouncing of the mails, especially when the incoming mail contains large attachments.

Even if it is from known source, and if it contains any attachment that is of suspicious nature or looks dubious, user should get confirmation from the sender about its authenticity before opening it. This is very much essential from the point of security of the user's computer; as such messages may contain viruses that have potential to damage the valuable information on your computer.
9. Users should configure messaging software on the computer that they use on permanent basis, so that periodically they can download the mails in the mailbox on to their computer thereby releasing the disk space on the server. It is user's responsibility to keep a backup of the incoming and outgoing mails of their account.
10. User should not share his/her email account with others, as the individual account holder is personally held accountable, in case of any misuse of that email account.
